**Purpose of Contact:** Further discussion of onsite soil as backfill at B123 site

---

### Discussion

A meeting was held with David Kruchek to review the existing B123 subsurface soil data (summarized in the *Industrial Area Sampling and Analysis Plan Fiscal Year 2002 Addendum #IA-02-01*) and to determine if soils removed adjacent to the remaining foundation footers on the north and east wings is suitable for use as backfill. Elizabeth Porttuff was contacted during this meeting via telephone conference call.

Based on the data review and discussion, Mr. Kruchek and Ms Pottorff stated that they both concurred there is sufficient data to show that soils adjacent to the foundation footer on the B123 north and east wing do not contain contamination and is suitable to use as backfill material in the footer excavations.
